

CCR Automate

The Chrysler *Car Care Rewards* (CCR) program is an excellent way to motivate your Service Advisors and Technicians. Points are earned whenever qualifying products or services are sold. Points can be redeemed for any number of products...like tools...or home theatres...or even an RRSP purchase!

Without *CCR Automate*, RO data must be manually collected and keyed into the Car Care Rewards website. This can be time consuming and can result in errors.

The new *CCR Automate* program from DMSPro ***eliminates this hurdle!*** It electronically extracts RO data from your DMS and then up-loads it to CarCareRewards.com.

With *CCR Automate* you can **process a week's worth of repair orders in minutes!**

Upload Data Weekly

Instead of keying RO data into the website daily, the *CCR Automate* program can be run as often as desired. The electronic transfer of 5 days worth of RO data takes about the same time as one day's worth, so you only need to run the program once a week.

Quarterly Program Updates

Chrysler may change the items for which it awards points from one quarter to the next. Your quarterly subscription fee keeps your program updated to ensure you are always tracking the correct items.

Simple to Use - Just a few easy steps!

1. **Run** our program to extract data from your system.
2. **Open** the report to format the data.
3. **Login** to CarCareRewards.com
4. **Click Import** to transfer the data.

Open the report created by our program to export the data.

Login to Car Care Rewards and import the data. It's that easy!

"The program DMSPro has developed allows us to quickly and easily capture our Car Care Rewards sales so that we can upload them to the Chrysler website. Each quarter, as Chrysler changes the incentive line-up, DMSPro sends us an update. The quarterly update and support fee of \$300 is good value. This program has saved us countless hours of tracking and keypunching. Every Chrysler Service Manager needs this tool!"

Steve Brookfield
Service Manager, Crowfoot Dodge

"The CCR Automate program has made the administration of the Car Care program easy. Before DMSPro installed their program, I was having each of my advisors key in their RO data on the CarCareRewards website. Each of them was spending up to 40 minutes a day collecting and re-keying information that was already in Reynolds. We now run a program once a week that uploads all the RO's to the website - and it only takes 10 minutes! Additionally, the sales data provides key information as to which advisors are selling what items & allows for easy comparison. This is definitely a must-have piece of software."

Sam Fairhall
General Manager, Wellington Motors

CCR AUTOMATE PRICING:
One time licence, setup and installation: \$500
Updates & support: \$300 per quarter
